### Product Description:

The 90916-03100 Engine Coolant Thermostat is designed to regulate coolant flow and maintain the engine at its optimal operating temperature. Manufactured according to OE specifications, this thermostat provides accurate temperature control, ensuring efficient engine performance, improved fuel economy, and reliable cooling system operation.

Featuring a high-quality temperature-sensitive valve and durable stainless steel construction, the 90916-03100 thermostat opens and closes precisely according to coolant temperature, helping prevent engine overheating or overcooling. This contributes to stable engine performance, reduced emissions, and extended engine life. OE references indicate an opening temperature of approximately **82°C (180°F)**.

The 90916-03100 is an ideal replacement for worn or malfunctioning thermostats and is widely used by distributors, wholesalers, retailers, and automotive aftermarket suppliers worldwide.
